Skills

- Programming Languages:** Java, JavaScript, TypeScript, Python, C#, C, SQL, HTML, CSS, PowerShell.
- Frameworks:** Angular, AngularJS, React, .NET Entity Framework, Node.js, NestJS, Spring, Hibernate.
- Databases:** MySQL, MongoDB, Oracle.
- DevOps & Tools:** Azure DevOps, Git, Windows Server, IIS, Linux, CI/CD, Scrum/Agile.
- Other:** OOP, Design Patterns, System Administration.

Languages

- Hebrew (Native)
- English (Fluent)

Proficiencies

- Rapid Technology Adoption
- Efficient Multitasking & Prioritization
- Team Leadership & Project Ownership
- Adaptability in Dynamic Environments
- References available upon request

YAHAV TZUKERMAN

Software Developer

Professional Experience

Full Stack Developer

ONECITY | NOVEMBER 2024 – PRESENT | HAIFA

- Develop complex web applications for municipalities (employee portfolio, organization portfolio, process management, MuniJobs) in AngularJS (v1), Angular (v2), and .NET Entity Framework with Oracle DB integration.
- Design and implement scalable backend solutions following best practices and modern design patterns, supporting both database-first and code-first architectures across multiple projects.
- Lead end-to-end development cycles, from requirements gathering to deployment and ongoing maintenance, ensuring robust CI/CD pipelines via Azure DevOps and deployments on Windows IIS servers.
- Maintain and troubleshoot live production systems, including server administration, codebase upgrades, and incident resolution.
- Work within an Agile/Scrum environment, actively participating in sprint planning, code reviews, and continuous delivery processes.
- Collaborate with cross-functional teams to deliver business-critical features, ensuring high-quality code and optimal user experience.
- Additional responsibilities include direct server management and monitoring, application health checks, and system optimizations.

Software Developer & System Administrator Lead

RAFAEL | JULY 2022 – NOVEMBER 2024 | DAVID

- Led E2E development for library management, server health checks, and system automation in Java, Spring, React, Python, and PowerShell.
- Optimize user experience using VDI (Virtual Desk Infrastructure).
- System Administrator- manage and optimize production environments (CAD).
- Receive requirements, build work plans, set KPIs and monitor planning vs executions (Jira).
- Scrum Master- lead a team within Agile methodology- manage tasks, mentor and guide.

Technological Project Manager

SIGMA AUTOMATION | NOVEMBER 2019 – MARCH 2022 | HAIFA

- Manage customer relations- support sales processes, implement solutions & deliver support.
- Developed storage/order management app; reduced support calls by 50%.
- Led training and bug management; collaborated with sales/marketing teams.

Development Integrator

RAFAEL | MAY 2016 – MAY 2018 | LESHEM

- Support development processes, run tests, identify and manage bugs for efficient performance, decrease production faults by 45%.

Personal Projects

- Node.js, React:** Full-stack production web apps using JavaScript/TypeScript, MongoDB, Express, CI/CD. Most projects are live in production. Also developed **Java Spring Boot & Spring Security** projects.
- See GitHub for demos and code.

Education

- BSc Computer Science** - The Open University, 2024 - present
- Full-Stack Java Development** - John Bryce, 2021 – 2023
- Pre-Academic Studies** – Technion, 2018 – 2019
- Electronics Practical Engineer** - Ort Braude, 2010 – 2012
